Dear Guests,

We serve specialty coffees, which are seasonally sourced directly from cooperatives in the country of origin and fresh after harvest. The coffees are roasted at our roasters at about 207 degrees Celsius for about 15 minutes. In conventional industrial roasting, the beans are roasted at 230 degrees Celsius (!) for just about 5 minutes. As a result, the bean is burnt on the outside and remains raw on the inside. It tastes bad and is not digestible. Why does our coffee taste so unique? Every morning our grinders are adjusted anew, readjusted several times a day and thoroughly cleaned in the evening. Our baby, the La Marzocco machine, and our trained baristi create wonderful coffees with fresh farm milk from a local farm. Our brewed coffees are hand-brewed with love. Our water is filtered and tempered precisely to 97 degrees Celsius and the beans are weighed to create something truly amazing. It's a pleasure you should definitely try pure, without milk and sugar. All our dishes and cakes are homemade with love. We only use fresh and mostly organic ingredients! ANIIS comes from Arabic and means "good friend" or "faithful companion". Our goal is to transfer this feeling to you, our guests.

Rachid & the ANIIS team
